

Correspondence of parts and screws of movement, chronograph mechanism and hour-recording, calendar and moon phase devices of calibers 23 (Technical Communication No 2) and 72, 72c, 88 and 90. (Parts of former types (see Technical Communication No 2 and also this leaflet) are not included in the following table.)

Correspondence of parts of the 5 calibers.

Ex. There are special types of plate 100 for each of the 5 calibers. There are special types of barrel bridge 106 for calibers 23 and 90, but calibers 72c and 88 have the same type as caliber 72. Balance cock 121 is identical in the 5 calibers. It should also be noted that certain parts have 2 functions, e. g. date jumper spring 2575, which also acts as month jumper spring 2583.

Correspondence of screws of the 5 calibers.

The following table is arranged in the same way as the table of parts given above; however, certain screws, identical in several calibers, are also identical with other screws; this is indicated by a number between brackets, placed after the caliber number, e. g. screw 5106 is identical with screw 5118, as the same number (7) appears after the caliber number.

	5101	5106	5106 ¹	5118	5121	5122	5125	5127	5145	5145 ¹	5311	5330	5336	5410	5423	5425	5430

When ordering parts for a shock-protecting device, make certain to specify its exact type. For further details of the description and numbering of spare parts, see Technical Communication No 2 (Valjoux, cal. 23) or the "Technological Dictionary of Watch Parts", 2nd edition, published by Ebauches S. A.

Order repair parts through your jobber, giving the numbers and designations, thus insuring prompt and efficient deliveries
